Education

Brock University

Bachelor of Arts in Interactive Arts and Science

St. Catharines, Ontario

Expected July 2026

Relevant Course Work: Discrete Mathematics, Data Structures & Algorithms, Front-End Development, UI/UX Design, User Research, Human-Computer Interaction, Audio Production

Skills

Languages: HTML, CSS, JavaScript, Java, Python, C#

Frameworks/Libraries: React.js, Node.js, Bootstrap, Three.js

Software: Unity, Autodesk Maya, Notion, Thonny, Visual Studio/Visual Studio Code, Figma, Canva, Adobe Photoshop, DaVinci Resolve, GitHub, Wix, Audacity, LMMS, Microsoft software, IOS software

Projects

Video-Editing Software Prototype

- Developed a video-editing software prototype using Figma and Claude A.I.
- Utilized Figma to design the mock user interface of the prototype
- Programmed and developed the final prototype, in collaboration with Claude A.I., using HTML, CSS, and JavaScript

PeekABoo | Single Player Horror Puzzle Game

- Responsible for producing in-game background tracks, music and foley sounds
- Used LMMS to record background tracks, then refined and edited them on Audacity for improved sound quality and added sound effects as needed

SubTrackt | Subscription Tracker Prototype

- Developed a website concept for a subscription tracker using HTML, CSS, JavaScript, and Bootstrap
- Utilized HTML/CSS to develop the front-end of the website, while using JavaScript to create interactive elements throughout the website

3D Shooter Game

- Developed a 3D shooter using Unity and Visual Studio
- Utilized Unity's built-in animation tools to develop and animate in-game elements

Activities

Sound Engineer & Foley Artist | Team PeekABoo | Brock University

April 2026

- Presented PeekABoo alongside other groups at the end-of -year Interactive Arts and Science department showcase and networking event
